Work Rights: Student Visa (500); eligible for 485 Graduate visa (full work rights) upon course completion, Dec 2026

PROFESSIONAL SUMMARY

Software developer with a Master of Information Technology from QUT and 2 years of professional engineering experience at Delta Electronics. Skilled in Python, JavaScript, TypeScript, and React/React Native, with hands-on experience across AI/LLM integration, full-stack web and mobile development, and cyber security. 1st place winner, 2026 QUT Sport Innovation Hackathon. Currently building an AI-powered vulnerability prioritisation platform as an industry capstone project; shipped AnyWear, a peer-to-peer travel wardrobe app with 20K+ downloads on the Apple Store.

TECHNICAL SKILLS

- **Languages:** Python, C#, JavaScript, TypeScript, SQL, HTML/CSS
- **Frameworks & Libraries:** React, React Native, Expo, Next.js, Node.js, Flask, Bootstrap, Tailwind CSS, scikit-learn, Pandas, NumPy
- **Databases:** PostgreSQL, Supabase, MongoDB, SQLite, MySQL
- **AI / ML:** Claude, Claud API, Ollama (local LLM), RAG pipelines, scikit-learn, supervised/unsupervised learning
- **Tools & Platforms:** Git, GitHub, GitHub Actions (CI/CD), Docker, Vercel, Expo EAS, Jupyter Notebook
- **Concepts:** Machine Learning, Agile/Scrum, SDLC, Cyber Security, Network Security, REST APIs, OOP, Human-Centred Design, IoT

PROJECTS

QUT Sport Innovation Hackathon — 1st Place

Apr 2026

Python, Flask, Claude API | Team of 5 | Team SightLine

- Brisbane's local sport engagement was projected to spike during the 2032 Olympics and drop sharply afterward, with the team tasked to design for lasting fan engagement.
- Built “Educated Spectating,” an AI platform using Python and Flask integrated with the Claude API to generate real-time, beginner-friendly explanations of rules, tactics, and key moments during live sports broadcasts.
- Won 1st place among all entrants and secured selection for an 8-week MVP development program with Innovation Central Brisbane, backed by QUT Sport as part of the Brisbane 2032 legacy initiative; reinforced the value of cross-disciplinary listening when working alongside product design and business teammates.

AI-Powered Vulnerability Management Platform (Vertex) — QUT Industry Project

2026

Vite, React, TypeScript, Go, PostgreSQL, Ollama

- Existing vulnerability tools rank findings without organisational context, forcing security teams to manually triage which incidents matter most.
- Co-developing a prioritisation platform with a Go backend, React/TypeScript frontend, and PostgreSQL data layer, using a self-hosted Ollama model to layer client-specific context onto a deterministic scoring engine.
- Delivering a working prototype despite limited access to sensitive validation data; the challenge of building client trust sharpened a habit of researching industry context ahead of stakeholder meetings to ask sharper, more informed questions.

AnyWear — Peer-to-Peer Travel Wardrobe App (iOS/Android)

2026

React Native, Expo, Supabase (PostgreSQL, RLS), Stripe Connect, Google Maps API

- Solo travellers overpack because renting clothing at a destination wasn't a viable option, and the product direction shifted repeatedly as the underlying business model was refined.
- Built a full-stack cross-platform mobile app single-handedly — listings with photo upload, bookings, real-time messaging, reviews, and ID verification — while iterating features alongside an evolving business plan.
- Shipped to 20k+ downloads on the Apple Store; the experience of building through model changes reinforced the value of locking down system design and business logic before implementation, an approach now applied on Vertex.

VIREX — E-Commerce AI Automation Platform

2026

Node.js, REST API, Claude Sonnet 5

- Manually listing products on e-commerce platforms is repetitive work well suited to automation.
- Designed and built an AI agent with a Node.js/REST API backend, integrating Claude Sonnet 5 to generate and automate product listing content.
- Delivered a working automation pipeline; identified that loosely specified prompts produced unstable output, sharpening a practical skill in precisely scoping LLM output requirements now applied across every AI-integration project.

Coursework Projects

- **Online Recruitment & Management Application (IFN636)** (*React, Tailwind CSS, Node.js, MongoDB, GitHub Actions*) — Built a full-stack recruitment platform with an automated CI/CD pipeline via GitHub Actions.
- **Online Food Delivery Website (IFN582)** (*Bootstrap, Python/Flask, MySQL*) — Developed an end-to-end food ordering platform, from menu browsing through order placement.

EDUCATION

Master of Information TechnologyFeb 2025 – Present

Queensland University of Technology — Brisbane, QLD

Relevant coursework: Programming Fundamentals, Advanced Algorithms and Complexity, Rapid Web Development with Databases, Machine Learning, Software Life Cycle Management, Cyber Security and Governance, Networks and Security, Human-Centred Design of IT Systems, Industry Project

Bachelor of Science in Mechanical EngineeringJun 2022

Yuan Ze University — Taoyuan, Taiwan

- Undergraduate Thesis Excellence Award; Cross-Culture Communication Award

PROFESSIONAL EXPERIENCE

Mechanical Engineer | Delta ElectronicsApr 2023 – Feb 2025

Taoyuan, Taiwan

- Collaborated with Microsoft engineering teams on cooling system design for Azure data centres, contributing to thermal performance and energy efficiency improvements through iterative design and field-test validation.
- Led problem analysis and root-cause investigation for engineering changes and sample production issues, supporting design decisions across multiple product lines.
- Managed Product Bill of Materials (BOM) drafting and verification, coordinating part material selection and supplier qualification across cross-functional design, manufacturing, and QA teams.

AWARDS

- 1st Place — 2026 QUT Sport Innovation Hackathon (Team SightLine)
- Undergraduate Thesis Excellence Award — Yuan Ze University
- Cross-Culture Communication Award — Yuan Ze University

LANGUAGES

- Mandarin Chinese (native)
- English (professional working proficiency)
